wetem trena taem blo treining. If yu likem ektra infomeisen lo eni sekson plis luk go lo TG.

Cover photo: Solar demo kit used in Vanuatu pilot community training. Source: GGGI Vanuatu.

Stetment fo diklearem no eni responsibiliti: Global Green Growth Institute hem no promesem, long toktok o mining, o hem no garem eni ligol laeabiliti o responsibiliti long hao stret, komplit o hao eni nara mek tri pati hem iusim, o risalt blong oketa iusim, eni infomeison, tul, produkt, o proses wea hemi stap insaed long infomison long disfala dokument o hem representim dat eni yus bae hem no brekem lo blong oketa praevet ona raet.

GLOSARI

AC: Olterneting karent hemi wan taep blo elektrisiti wea hemi sens olowe noma, hem prodius bae oketa invetas, jeneretas an bigfala paoa sitims.

Saj Kontrola: Wanfala pat wea kontrolim na taem bateri hem saj an save stopem for noken ovasaj.

Klam Mita: Wanfala divaes wea save yusim fo mesarim na karent lo eletrik seket, wael mos lo adas save duim na oketa narafala mesament

Karent: hemi flo blo elektrisiti saj insaed lo seket waeas

DC: Daerekt Karent hemi wan taep lo elektrisiti prodius bae sola panols. DC paoa save daerekli ranem laets an smol divaesis.

Elektrikol paoa: Hem reit wea eneji hemi yused o prodius insaed lo wan seket, save mesarim lo Wats.

Elektrolaet: Diswan hemi kjemikol likwid wea save faedim na insaed lo asid bateri. Hem ya hem korosiv asid tumas an denjaras.

Inveta: Wan divaes wea konvetim DC Elektrisiti go lo AC elektrisiti.

Lod: Eniting wea tekem ap na paoa or yusim na elektrisiti fo waka osem laet, fan etc

Maonting: samting wea yu save yusim fo holem na oketa pats in ples (tugeda). For eksapol, oketa pats an fittings wea yused fo instol an sikurim na sola panols lo ruf o ontop lo graon

Molti-Mita: Wan divaes wea hemi yused fo duim na tests an mesamens lo elektrikol seket osem mesarim na volteij, kontiniuti tests etc

Ovajaj: Hem taem yu gohet sajam bateri taem hemi ful finis - Diskaen bae save mekem sot na bateri laef o save damejim.

PV Arei: hemi minim staka sola panols konek tugeda

Sot seket: Taem laef waea blo oposit polarity kontak daerekli wetem ij ada, yumi save kolem na lo sot seket. Fo eksapol, taem positive an negative teminols blo bateri tas. Sot seket save spoelem na komponents an kosim na faea an sirias injuris .

Sola Panol: save kolem osem 'PV modiul' or 'PV panol'. Hem divaes wea prodiusim na elektrikol eneji taem eksposim go lo sunlaet.

Teminol: Elektrikol koneksin post wea fo konektim na waeas go lo divaes. Fo eksapol, olketa batri weak am wetem positiv an negative teminols fo alaom na koneksin blo batri go lo nara sekets. Everitaem garem na bolts lo teminols fo taetim na elektrikol karent.

Volteij: Hem na potensol difrens bitwin tufala poents insaed lo seket an hem na wanem kosim na karent fo flo.

Aes Breka- Introdaksin

AKTIVITI 1

Introdiusim yu seleva long evriwan taem treina askem yu. Bae askem yu fo talem nem blong yu an talem lelebet save nolej yu garem long sola. Yu mas talem tu wanem yu save duim an sapos yu hapi long veniu o nomoa.

2

Olketa pat blong
Sola PV system

Garem olketa difren pat wea hem yius insaet sola PV system. Taem adem nao olketa difren pat ya hem sensim tu karektaristik blong system ya.

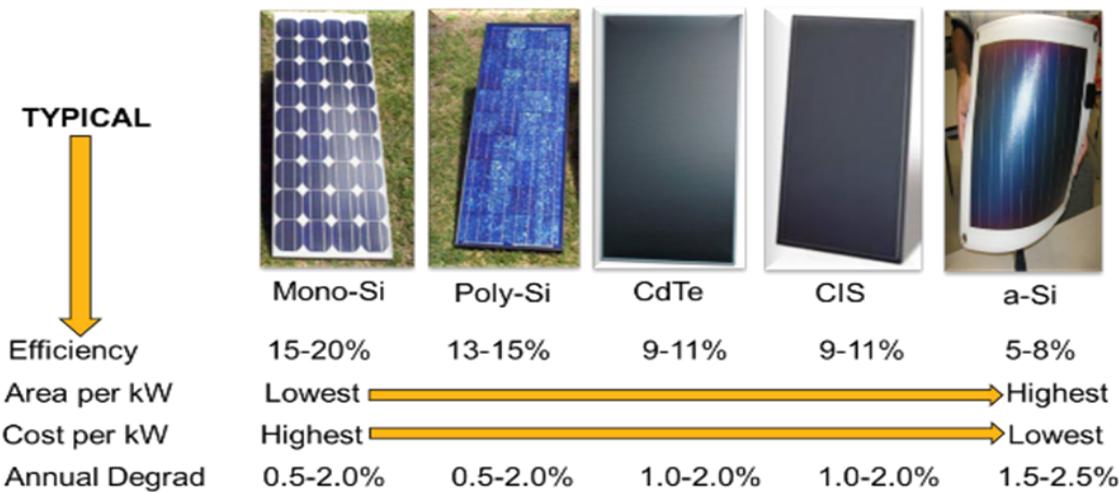

2.1 Sola Panol (PV Modiul)

Solar PV modiul hem prodiusem nao paoa taem konvete sanlaet go long eneji. Hem garem olketa difren taep long PV modiul, evriwan long olketa hem garem aplikeisin blong hem karektaristik long hao hem waka.

FIGA 1: Sola panol¹

FIGA 2: Difren taep lo sola panol (PV Modiul)²

Ful nems blo PV modiuls

- Mono-Si: Monocrystalline silicon
- Poly-Si: Polycrystalline silicon
- CdTe: Cadmium telluride (CdTe). This is thin film technology
- CIS: Copper indium gallium selenide solar cell. This is thin film technology
- A-Si: Amorphous silicon. This is thin film technology

2.2 Saj Kontrola

Saj kontrola hem limitem nao reit long hao elektrik karent hem ad kam o tekem nao from olketa elektrik batri. Hem stopem ovatasajing an save help aegensim ovavolteij.

- Olketa batri olketa save wakem yusim nao led an Led Oksaed elektrods an hem garem salfarik asid wea hem no strong.
- Garem olketa narafala taep long batri tu osem Nickel-Cadmium, Lithium an samfala moa.
- Long Sola sistem, olketa batri saj long sola panol long deitaem an disfala batri ya saplaem paoa long naet-taem.
- Olketa Otomativ batri hem no gud fo sola. Olketa wakem olketa fo givim bik amaont long karent long sot team.
- Olketa sola batri hem difren. Olketa wakem fo givim smol amaont long karent long bik amaont long taem.
- Olketa batri wea hem no open yiet hem garem volteij wea hem save kasem 14.1 v, batri wea hem tuweit hem save saj go kasem 14.4 V.
- Batri Kapasiti.
- Kapasiti hem mesa blong elektrik saj wea hem stap o eneji wea hem stood long batri wea hem save duim waka long taem wea hem garem.
- Ampere-hour (Ah) hem mesamen yunit blong batri eneji stoarej kapasiti, an hem ikol long transfa blong wan ampere fo wan aoa.
- Kapasiti hem dipen long tempresa blong batri, dissaj reit an kat-of volteij.
- Batri hem garem hae feilia reit long evri komponen long DC or Ac lod.
- Olketa led-asid batri wea hem tuweit hem garem elektrolaet likuid, olketa batri wea hem no open hem garem elektrolaet wea hem fiks.

2.3.1 Olketa tuweit batri

Diswan hem ol wei blong ejin fo stat, trakta an dip saekol-stael batri. Likuid elektrolaet hem fri fo muv insaet kopatmen lo sel. Yiusa garem akses long olketa difren sel an save adem wata wea hem disolv taem batri drae aot. Olketa popiula wan nao statem enjin an olketa dip saekol disaen.

2.3.2 Olketa batri wea no open

Disfala wod save yusim fo olketa difren taep konstraksin wea hem inkludem tu lelebet modifikeisin lo stael wea hem tuweit. Wanfala difrens nomoa hem olketa wea wakem mekem dat enaf asid hem stap insaet batri fo save mekem kemikol rikasin long nomol yius blong hem long taem fo yusim batri. Olketa popiula yius long diswan hem fo statem enjin an fo limitim stating/dip saekol apklikeisin.

2.3.3. Olketa AGM Batri

Absob Glas Mat konstraksin hem alaom elektrolaet fo hem hange wetem aktiv matiriol blong pleit. Long tiori, this wan hem waka fo mekem dis saj an risaj hem waka gud. Popiula yius hem inkludem hae waka long hao enjin hem stat, spot wea yusim paoa, ddp sekol, sola an storej batri.

2.3.4 Olketa GEL batri

(Sel/Gel Batri hem osem nao AGM batri stael bikos elektrolaet hem olsem hange nomoa bat hem difren tu from AGM batri wea hem olsem tuweit sel. Elektrolaet wea hem stap long gel cel batri hem garem silika long hem we hem save mekem fo set ap o stif. Olketa risaj volteij long diskauen taep sel hem lou den olketa narafala stael blong lid asid batri. Olketa Gel batri hem gud fo yusim long barava DIP Saekol apklikeisin an hem save stap long taem lelebet long hot weda).

2.4 Olketa Kebol

FIGA 9: kebols⁸

Olketa elektrikol kebol save yusim fo konetkem tu or staka divaes wea fo save transfa olketa elektrikol signol o paoa from wan divaes go long narawan.

⁸ Source: Global Market, http://newimg.globalmarket.com/PicLib/group0/5e/73/c477defc613ecc9a0e47b82452f4_1.jpg

2.5 Seket Breka/Aesoleita

Waka blong seket break hem fo stopem na flou blong karent sapos wanfala folt hem hapen. Isoleita hem wanfala makanikol suis divaes wea long open posisin hem diskonekt divaes an alaom isoleisin blong input an aotput blong wanfala divaes.

Seket breka hem garem difren ampereij reiting olsem 10A, 16A, 32A an samfala moa. Eksampol nao, sapos yu yusim 10A breka an yu konektem 12 Amps lod, breka bae diskonekt (diswan olketa save kolem olsem trip). Diswan hem fo protektim nao ovakarent insaed lo seket fo sefti.

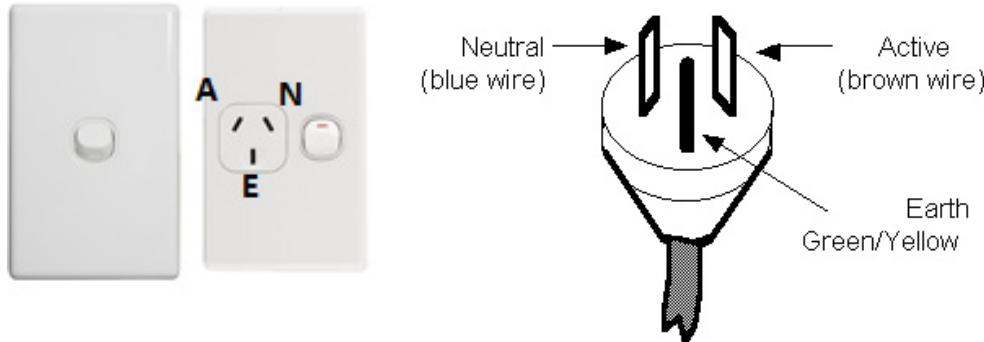

FIGA 10: Seket Breka an Aesoleita⁹

2.6 Suis an Paoa Soket

Suis save separatem paoa an paoa soket hem fo konektem/diskonektem olketa samting wea save yusim paoa.

FIGA 11: Suis an paoa soket (ASC)¹⁰

2.7 Inveta

Inveta hem elektronik divaes o skeet wea save sensim darekt karent go long altaneiting karent. Hem garem olketa difren taep long inveta fo difren waka. Selektim nomoa inveta fo sistem wea bae hem save stan ap seleva hem beis nao long olketa samting ya.

- Batri input wea volteij blong hem (12, 24 o 48 V).
- AC aotput volteij (120 o 220V).
- Hae AC paoa nao fo kumiulativ lod (diswan long wats).
- Karent hem hae (e.g., moto/enjin) rikuemens sapos hem long eni (amps).
- Samfala fisalisa (saja blong batri an osem).

FIGA 13: Waka blo inveta¹²

FIGA 14: Difren taeps blo inveta¹³

	Stand-Alone Inverter	Operate from batteries and supply power independent of the utility grid
	Interactive Inverter	Operate from PV arrays and supply power in parallel with the utility grid
	Bi-Model Inverter	Transfer PV system operation to a stand-alone mode and provide backup electric power to critical loads when the utility grid is not energized

2.8 Sola panol maonting system

FIGA 15: Maonting brakets¹⁴

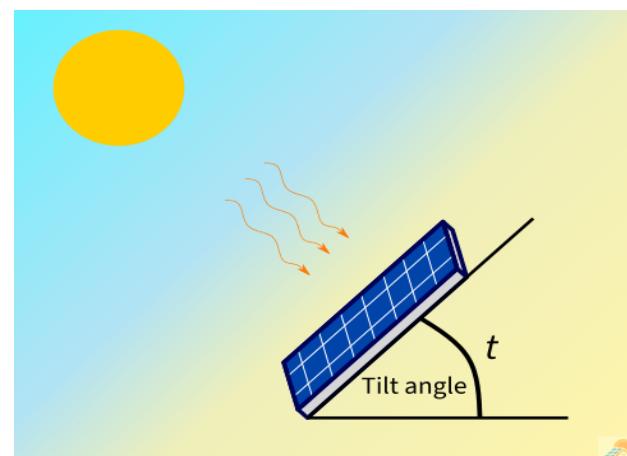

Fotovoltaik maonting sistem hem fo fiksim olketa sola panol long ruf, saed long bilding o long graon. Olketa maonting system ya hem for mekem retrofitting blong olketa sola panol long olketa ruf olsem pat long bilding ya.

2.9 PV Modiu orienteisin

Nomata wanem kaen maonting strakja hem siusim, mein pepos blo maonting na hem fo alaom na seif an sikua fiks fo maontem nao olketa PV modiuls antap. Narafala samting moa wea hem impotent tu hem fo muvum lelebet nao sola panol an feisim long daerek sin wea bae hem save tekem staka eneji from san bat den avoidem tu seding.

FIGA 16: Sola panol orientesin¹⁵

Long Solomon Aelan, evri PV modiul mast tanem olsem long 10 digris an feisim long Not daerek sin¹⁶, diswan hem fo tekem maksimam PV paoa genereisin from olketa modiul insaet yia.

2.10 Et an Graonding Komponent

Wanfala rikuamen fo putum olketa PV sistem long graon fo help fo protektim yu from eni sok an fo dae tu wea bae save hapen (taem sei an laeting). Hem save help tu fo stopem faea long sistem taem instolem finis. Fo talem long narafala wei, taem yu duim gud long diswan taem yu instolem PV bae hem save protektem yu.

Olketa Rikuamen
blong Sola PV Pat —

Bikos yu introdius finis long olketa komponen yius long sola sistem, disfala sapta ya bae givim yu diteil long olketa komponen ya long hao hem opereit an wanem nao olketa rikuiamen long opereisin blong hem.

3.1 (PV Modiu) (Sola Panol)

Hem impoten fo mas save abaoatem olketa rikuamens blong PV Modiu. Samfala long olketa impoten samting ya nao olsem

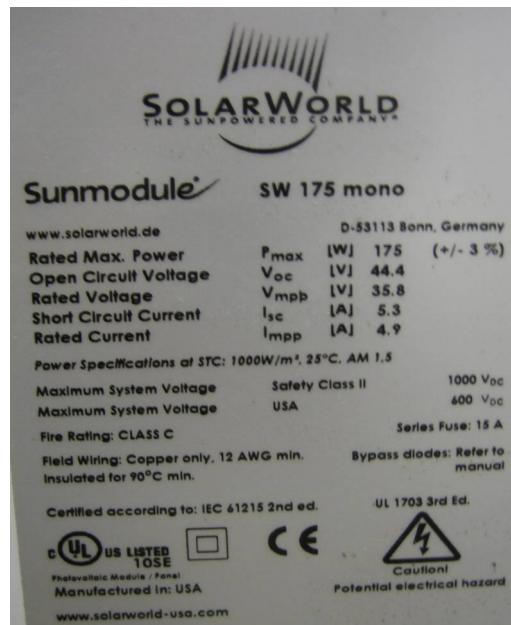

- Wanem nao opereiting volteij.
- Wanem nao maksimam paoa.
- Wanem nao opereiting karent.

Evri PV Modiu (panol) mas garem nao olketa infomeisin ya (sapos nomoa olketa mas kam from sos wea hem no gud tumas)

- Open seket volteij.
- Shot seket karent.
- Opereiting volteij.
- Opereiting karent.
- Maksimam Paoa.
- Polariti blong olketa teminol.
- Maksimam volteij long sistem wea hem alaod.

Mas save olsem dat taem iradians hem go hae, paoa an karent aotput hem hae go tu bat volteij blong PV panol hem kolsap stap semsem nomoa bituin 200-1000 W/m².

FIGA 19: Nemplet data lo Sola PV Modiu¹⁹

3.2 Ifekt blong Tempresa

Sel tempresa pleim kritikol rol long waka blong PV modiu

- Volteij dikris long 1% fo 2°C inkris long tempresa.
- Karent inkris 1% fo 12°C inkris long tempresa.
- Paoa dikris long 1% fo 2.2°C inkris long tempresa.

3.3 Saj kontrola

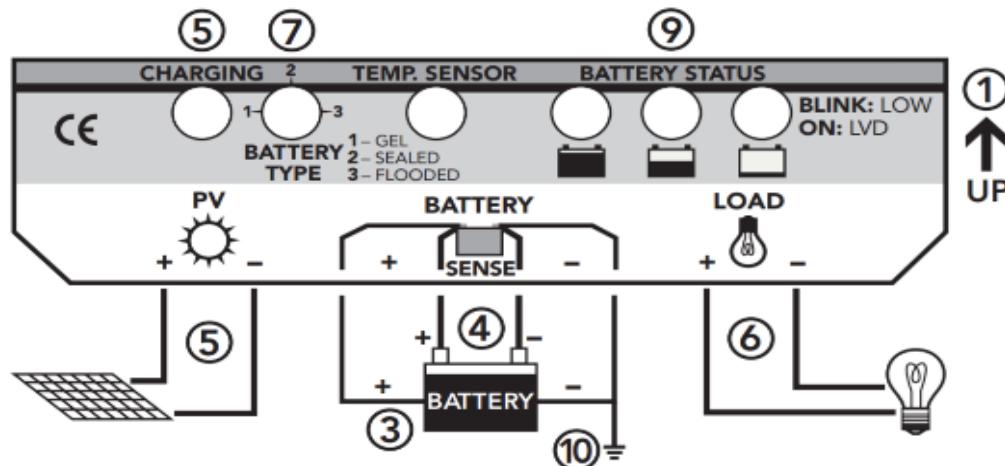

Saj kontrola mas garem

- Garem nakarent kapasiti wea hem fitim fo saj (ampères from sola PV) an fo opereitem nao olketa lod (lod blong karent).
- Akomodeitem nao PV input volteij an batri volteij.
- Garem nao pik DC paoa mas stap nao fo kiumueitev lod.
- Fleksibol fo waka wetem olketa difren taep batri.
- Mas rilaebol-olketa simpol kontrola nao olketa waka gud ovam nao olketa wea garem staka samting fo folom. avoedem nao olketa wan wea garem LCD skrin, maekro prosesa program control an samfala moa.

Samfala samting fo save moa long hem nao.

- 3 posisin batri selekt: gel, no open o tuweit wan.
- Sajing wea yu save yusim tempresa.
- Olketa LED fo soum steitas an olketa folt blong batri.
- Olketa rimout batri volteij sens teminol.

FIGA 20: Spesifik fijas blo saj kontrola²⁰

3.4 Olketa batri

Olketa batri save stoarem nomoa paoa an no jenereitem nao paoa

- Yunit sel hem 2V.
- 2V hem minim nominal volteij. Volteij reij hem araan 1.85 V go kasem 2.40V.
- 12V batri garem 6 yunit sel long sirias taem konektem.
- 6V batri garem 3 yunit sel long sirias taem konektem.

**Instolem Sola
PV sistim** —

Taem instolem Sola PV sistem, stret elektrisian nao mas duim. Hem garem samfala disaen an instoleisin standad fo folom fo meksua korekt an instoleisin hem seif an hem folom nao gud praktis blong industri.

6.1 Siris koneksin

Olketa PV modiul olketa konekt elektrikoli long sirias fo inkrisim nao volteij aoutput (aoutput blong karent hem stap semsem nomoa). Insaet long sirias koneksin, positive teminol blong wanfala sola modiul hem konektem go long negative teminol blong narafala modiul. Lod wea hem konekt go long positiv en an go long negative en blong disfala string. Fo hem barava waka gud tumas, evri modiul long olketa string ya mas semsem.

FIGA 46: Siris koneksin⁴⁴

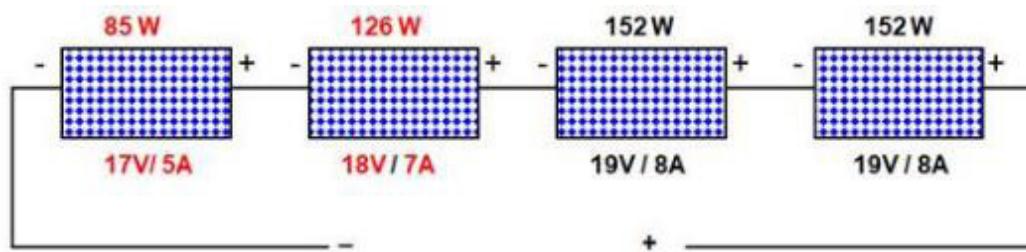

Total voltage: $4 \times 19V = 76V$

Total current: 8A

Total power: $76V \times 8A = 608W = 4 \times 152W$

FIGA 47: Siris wetem miks saez⁴⁴

Total voltage: $2 \times 19V + 17V + 18V = 73V$

Total current: 5A

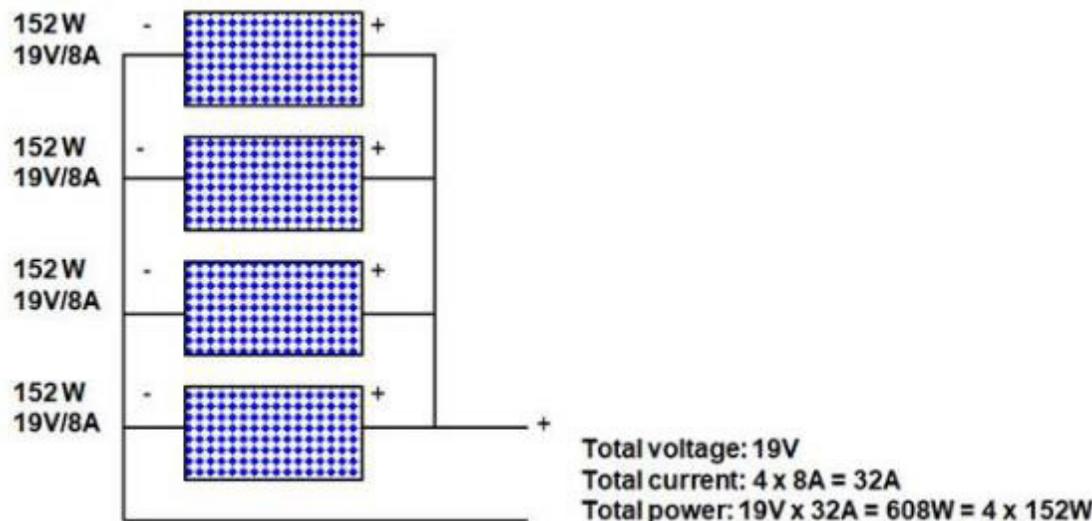

Total power: $73V \times 5A = 365W$ (243W lower wattage or 40% loss of installed power)

6.2 Paralel Koneksin

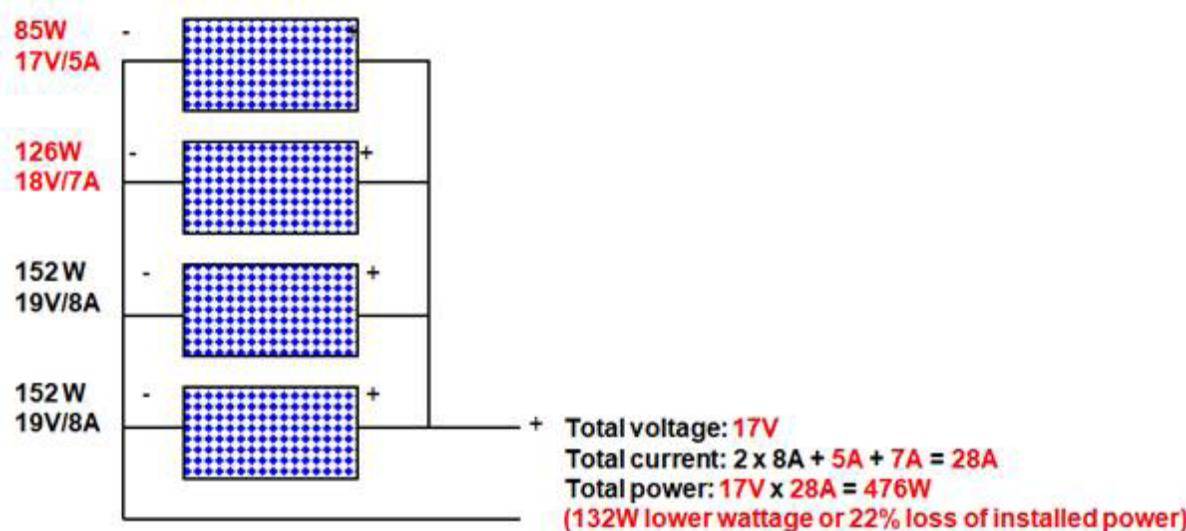

Olketa PV modiul konekt elektrikoli long parallel fo inkrisim nao aoutput blong karent (volteij hem stap semsem).

Long parallel koneksin, positiv teminol blong wan modiul hem konekt go long positiv teminol blong narafala panol an negativ teminol blong wan modiul hem go nao long negativ teminol blong narafala panol.

FIGA 48: Paralel Koneksin⁴⁴

FIGA 49: Paralel wetem olketa miks saez⁴⁴

6.3 Pripea fo instoleisin

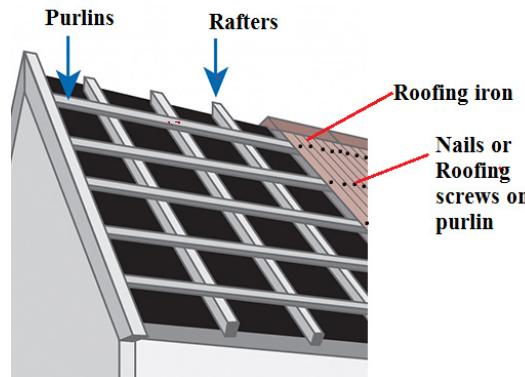

Bifoa yu stat fo instoleisin, yu mas planem nao instoleisin an tekem nao evri matriol wea yu nidim fo stat. Yu mas save gud an disaed sapos hem sirias or parallel koneksin wea bae yu duim an luksave fest nao long eni seifti isu wea maet kam ap. Mas mek sua garem PPE (pesonol protektiv ikiupmen) bifoa yu statem sola instoleisin). Yu mas meksua tu korekt saes an namba long olketa pat hem kasem nao ples yu bae duim instoleisin.

6.4 Sola PV modiul maonting

No mata watkaen taep maonting nao yumi siusim, taem instol mas meksua dat maonting ya hem strog, seif an hem no afektem nao propa opereisin blong olketa sola panol.

6.5 Ruf maonting PV modiuls

FIGA 50 : Wud Stakja lo ruf⁴⁵

Fest ting fo duim nao hem fo setem ap nao maonting beis (samtaem olketa kolem long L-fit) wea hem shud stap nao long pelin long ru yiusim nao olketa skru blong ruf).

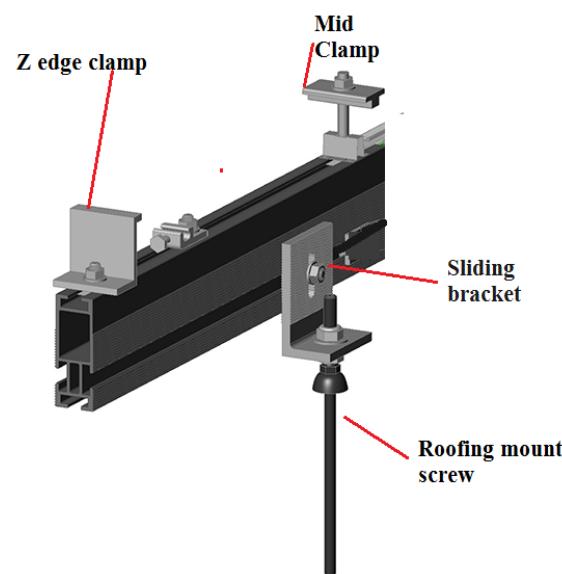

FIGA 51: Sola Reils lo korugeisin⁴⁶

Neks, olketa sola reil konekt go long L-fit. Olketa sola reil ya hem gud an hem praktis wea mas duim taem putum ap staka sola panol long ruf.

Fo hem waka gud long Solomon Aelan, tilt (hao fo benem) hem mas 10 digri an kolsap long latitiud agol araan 8 go long 13 digri.

FIGA 52: Eij an mid klam fo sola maonting⁴⁷

Taem olketa reil ya hem stap strong, instolem nao sola panol an putum antap long olketa reil yiusim nao difren taep long klam.

FIGA 53: Sola panols wea oketa maontim lo reils⁴⁸

AKTIVITI 12 O MANDETRE

Pat A: Diskasin long olketa seifti prekosin

Olketa lena mas go insaet grup an imaginem olsem bae olketa instolem tufala 50 wat panol wetem trifala 30Ah batri inkludem nao 20A saj kontrola, tufala DC laet an wanfala 100W inveta wetem wanfala sigol AC laet balb olsem wanfala lod.

Fes samting fo duim hem fo olketa lena fo diskasem nao olketa seifti prikousin wea olketa nid fo mekem taem duim instoleisin. Olketa mas stori stori abaotem den olketa save raetem daon tu.

Part B : Instolem wanfala sola wea hem save stanap seleva (stan alon) DC + AC sistem

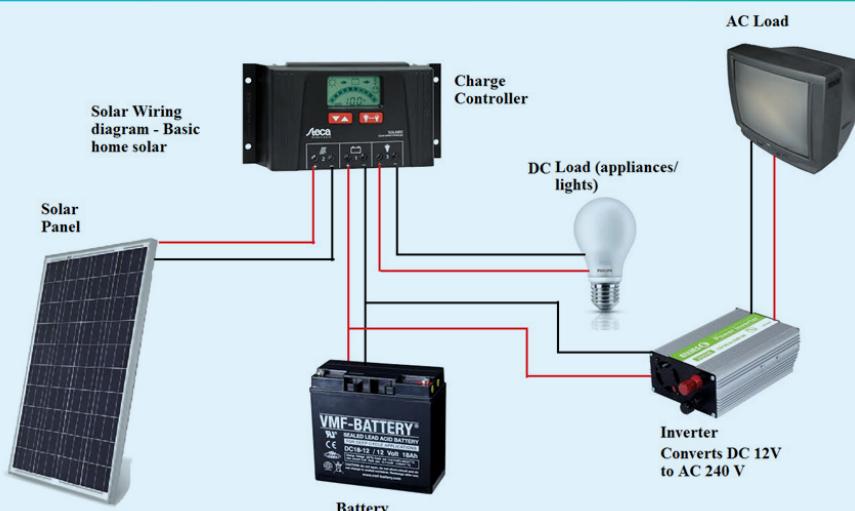

Givim fo olketa lena wanfala sola PV sistem wea hem garem nao olketa saming ya:

- Olketa sola panol
- Olketa batri
- Saj kontrola
- Inveta
- Olketa DC laet balb (10W) wetem wanfala suis olsem AC lod
- AC laet balb (10W) wetem suis

- Sola panol maonting kit
- Elektrik waea
- Olketa plae, skru draeva, maltimita
- PPE-olketa glav wea hem insuleit, aeglas, olketa tul wea hem insuleit, olketa helmet an hanes fo ruf)
- Olketa wea konekta an DC seket break

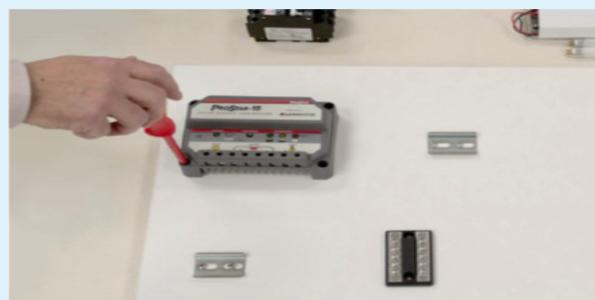

Insaet long disfala aktiviti ya, olketa lena bae traem nao hao fo instolem wanfala ril sola PV sistem wetem seket daogram:

FIGA 72: Koneksin daegram blo DC+AC sola PV sistim⁶⁸

1. Attach charge controller with long screws to four threaded screw inserts on upper left corner of the wiring board.

2. Snap on four DC switches to DIN rails by pushing in yellow tabs at the bottom of the switch.

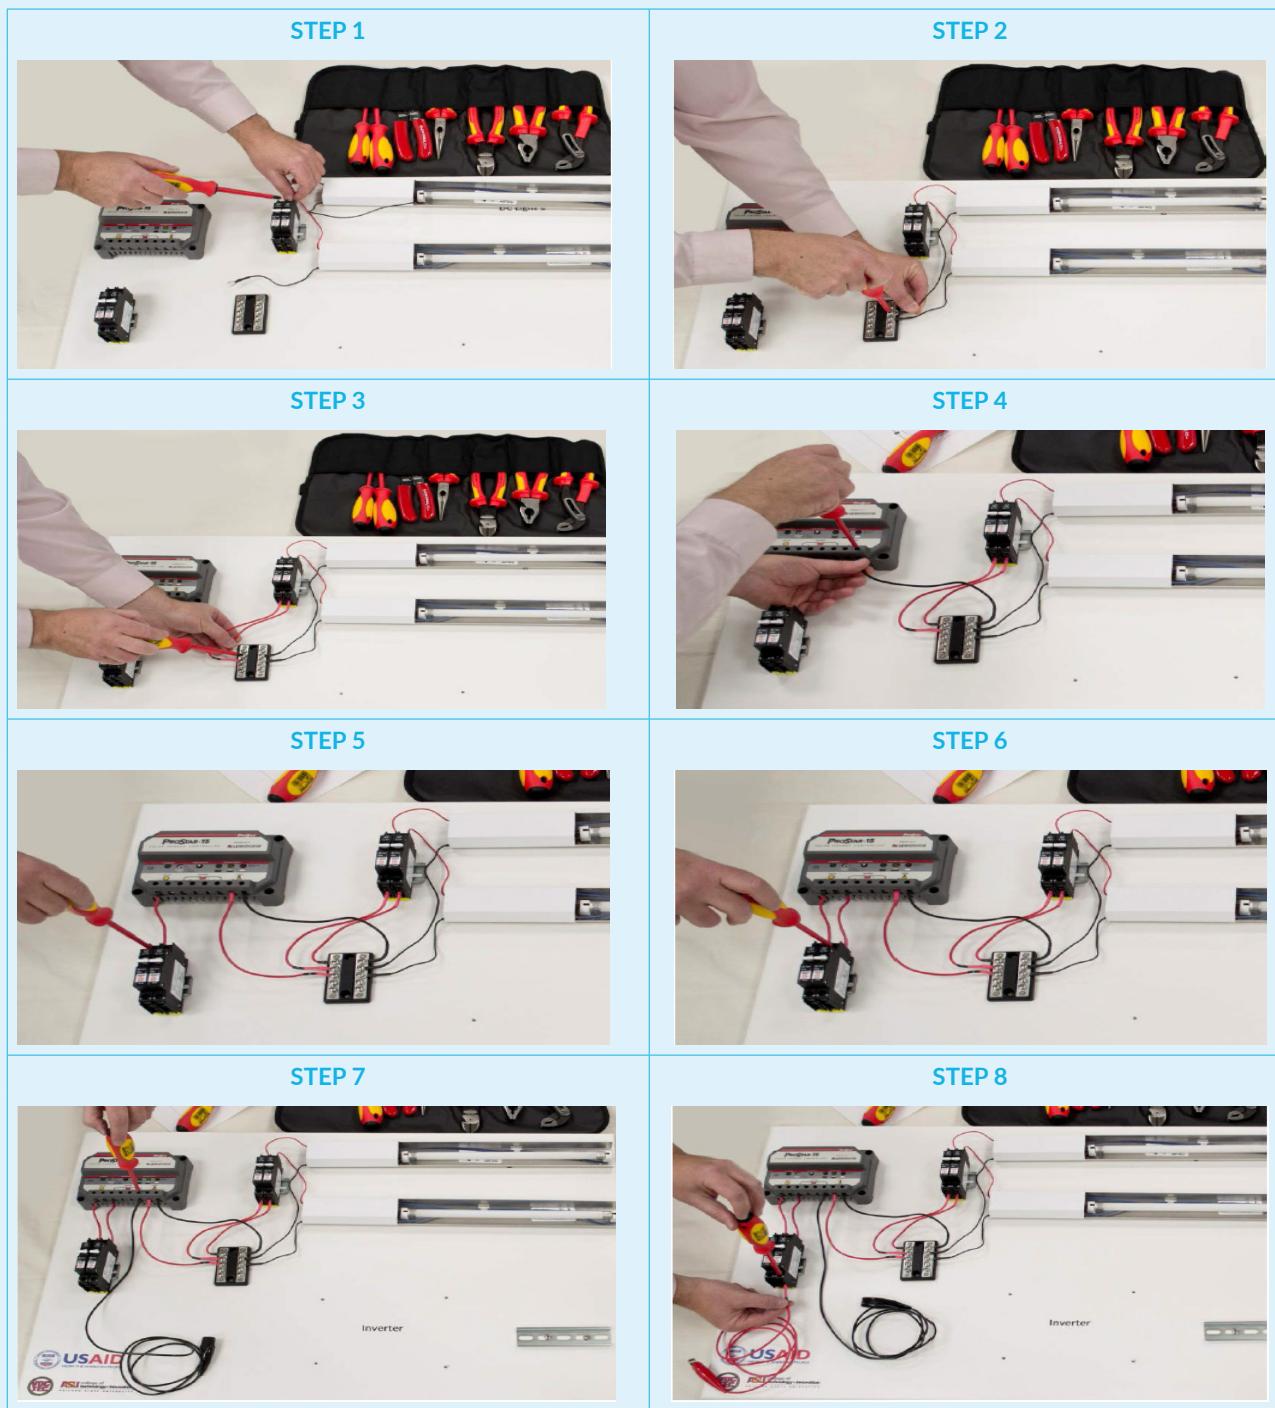

3. Attach DC light fixtures with small screws to threaded screw inputs on upper right corner of wiring board (DC light fixture with wires labeled 1 should go above DC light labeled 2).

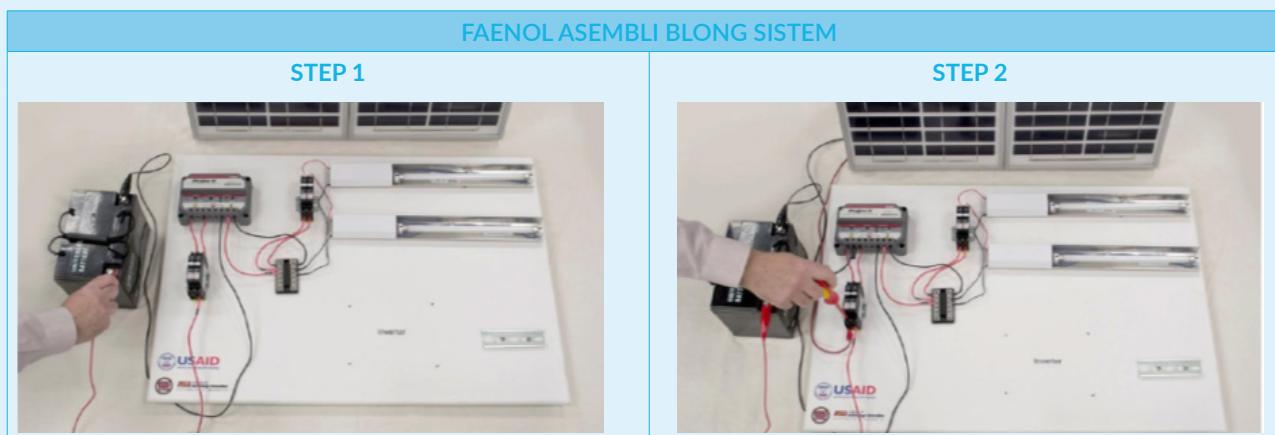

4. Snap in DC light bulbs to fixtures by gripping the metal ends of the bulb. (Insert bulbs into fixtures and gently rotate bulbs until they snap into place).

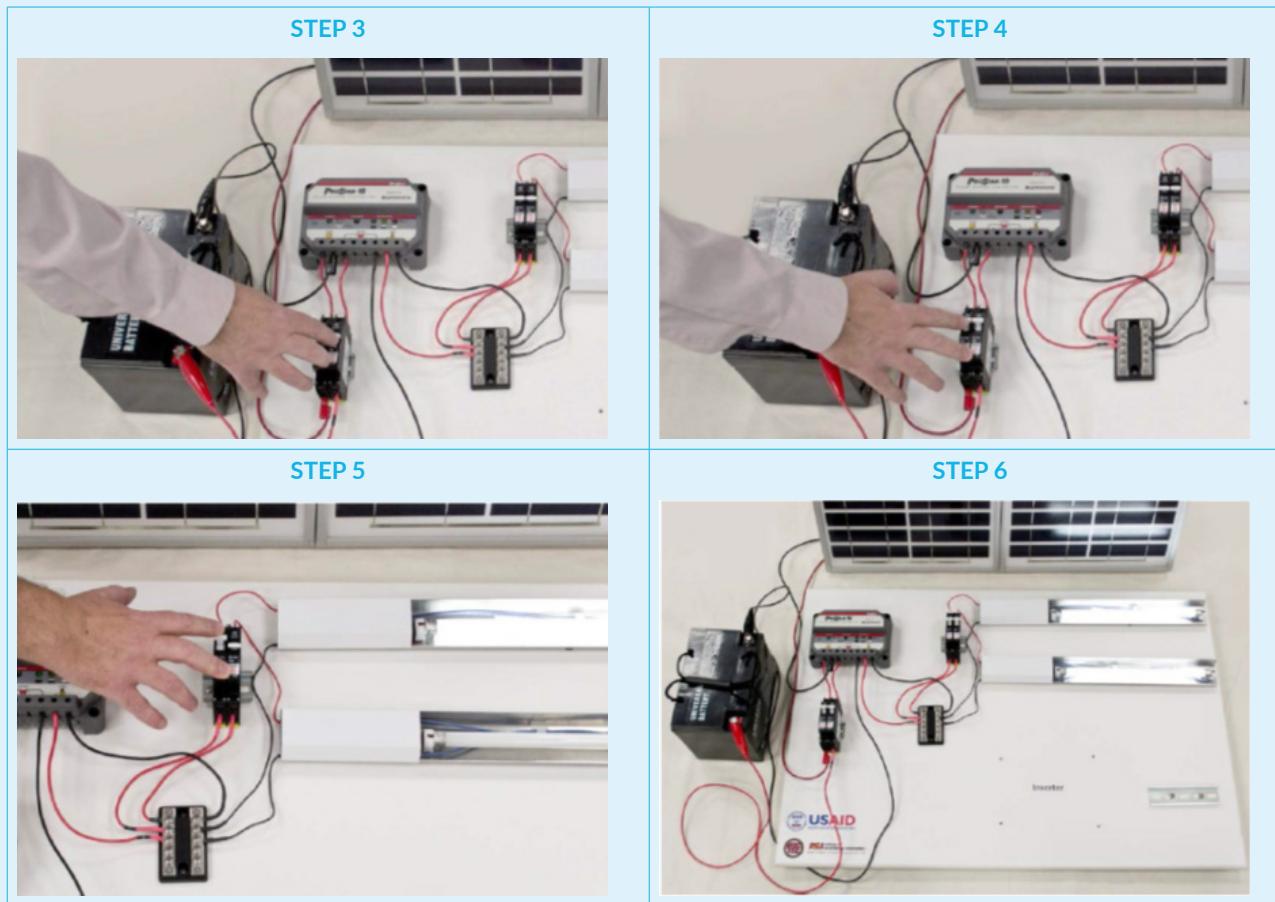

Distaeem bae waearem nao olketa difren pat blong DC sistem.

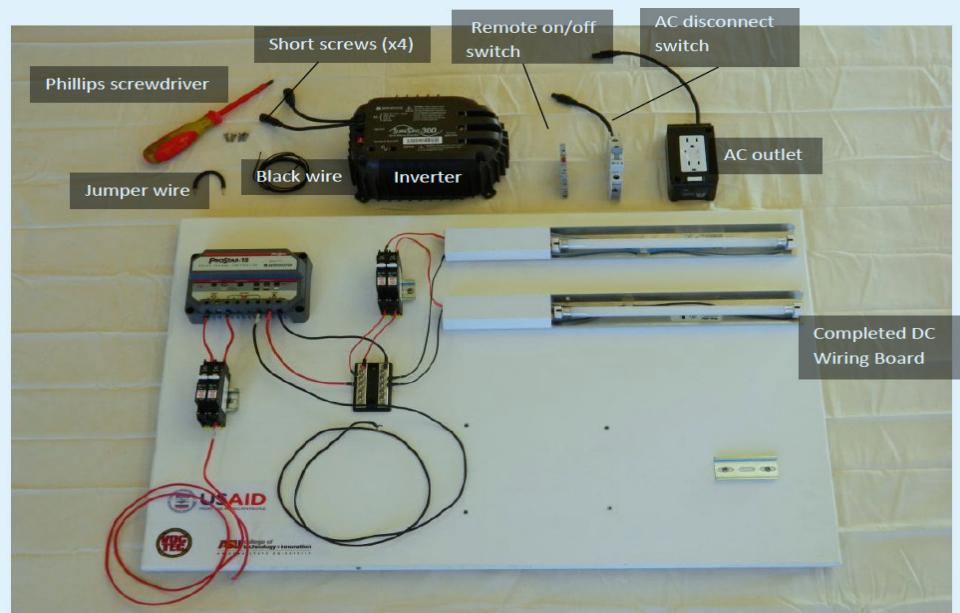

Long neks step, bae yumi koneketem batri an panol

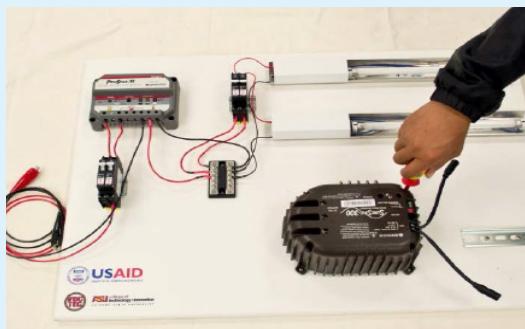

Nao dat yumi garem DC sistem, yumi muv moa long AC sistem. Long hia garem samfala pat wea bae yu nidim

8.4 Sekem olketa volteij blong batri

Hem impoten fo ripleisem olketa batri wea olketa barava no waka gud fo no spoilem olketa nrafala batri long batri bank sapos staka batri konekt tugged.

FIGA 77: Batri Jajing – olweismonita volteij⁷²

8.5 Jenrol balans blong olketa folt long ikuipmen

Olketa folt

- Olketa kebol, suis, laet an samfala moa
- No laet taem batri hem ful saj
- Ada volteij long en long lod
- No paoa long en long lod

Olketa rison:

- Open o sot seket o graonding
- Olketa kebol hem adasaes an no stret wan fo yiusim (bik drop long volteij)
- Ben aot DC laet/inveta
- Slak koneksin long olketa teminol
- Hae resistens long suis kontak

Remedi/wanem nao fo duim:

- Sekem volteij levol long en long lod an drop long volteij wetem laet taem onem.
- Taetem olketa lus koneksin long olketa teminol.
- Sekem saes long kebol sapos kebol wea hem instol hem raet saes, sensim sapos hem nesasari.

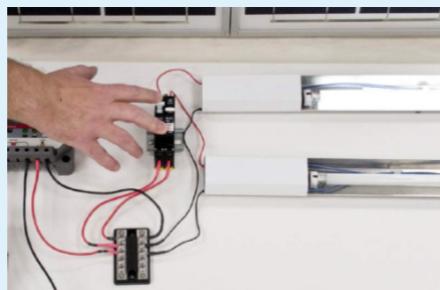

- Sekem kontiniuiti blong olketa kebol, taem open seket, treisem laen an korektem nao open seket).
- (Sekem an stretem nao olketa posibol so seket an graonding wea hem no stret long laen, ri-insuleitem sot seket/graoen laen).
- (Sekem opereisin blong suis an drop blong volteij bituin input go long suis an aoput from suis taem tanem fo onem).

Not

AKTIVITI 13- KONTINIUITI TESTING

Fo disfala aktiviti, wanfala waea hem garem folt wea hem konekt nao bituin batri an saj kontrola. Treina nao duim diswan fo olketa lena save hao fo ditek an yiusim kontiniuiti test.

Setem ap nao DC Sola PV sistem an soum dat hem waka

Sapos lena ya hem lukim hem waka-sensim wan gud waea wetem wanfala nogud waea.

2. Turn off disconnects and replace positive (**red**) wire between battery and charge controller with supplied “faulty” **red** (labeled with 0)

3. Turn disconnects back on - DC lights will not turn on

Yu save demonstretem nao folt faending ya n koreksin aktiviti yiusim nao olketa instraksin ya

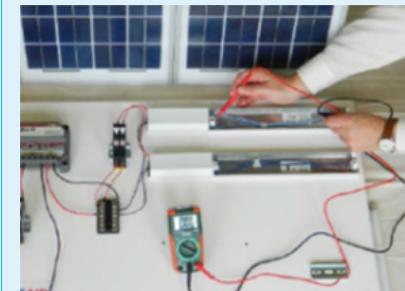

1. Conduct visual imperfection of system.

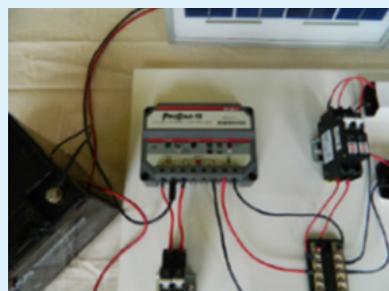

2. Remove DC light bulb(s).

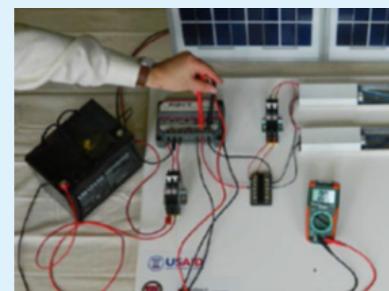

3. Measure voltage at light fixture terminals (voltage should be 0V).

4. Check indication lights at charge controller (all light should be off).

5. Measure voltage at charge controller's load output (voltage should be 0V).

6. Measure voltage at charge controller's battery input (voltage should be 0V).

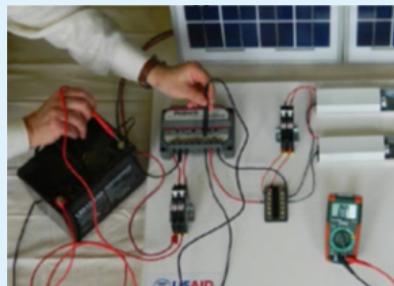

7. Measure voltage directly at battery terminals (voltage should be above low voltage reconnect LVR).

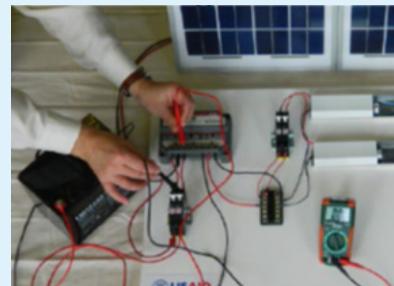

8. Problem is identified as "broken continuity" between battery and charge controller.

1. Switch multimeter to continuity setting and check connection between negative battery terminal and negative charge controller battery input.

2. If multimeter beeps, the circuit is continuous. Measure continuity between positive charge controller battery input and disconnect switch (DMM should beep).

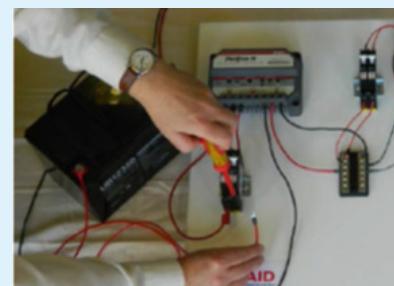

3. Measure continuity between input and output terminals of disconnect switch (DMM should beep when switch is on).

4. Measure continuity between disconnect switch and positive (red) battery terminal (DMM will NOT beep).

5. Problem is detected as discontinuity between battery positive terminal (red) and disconnect switch.

6. Check connecting cable for faultiness. Cause is identified as wire insulations not stripped at battery connector.

9

Metenens seklis
blong Sola PV —

9.1 Mentenens Plan

Fo sek olowe hem wanfala best wei fo inkrisim nao laef blong sola PV sistem blong yu an olketa pat blong hem) Rutim mentenens hem wat save duim olsem wanfala sek wea hem garem nao lis long olketa aetem blong olketa difren pat wea mas tikim. Seklis ya hem fo meksua dat olketa difren pat ya hem yu inspektem, klinem, ivalueitem an sevesem tu mekem olketa save stap longtaem.

9.2 Mentenens blong sola panol

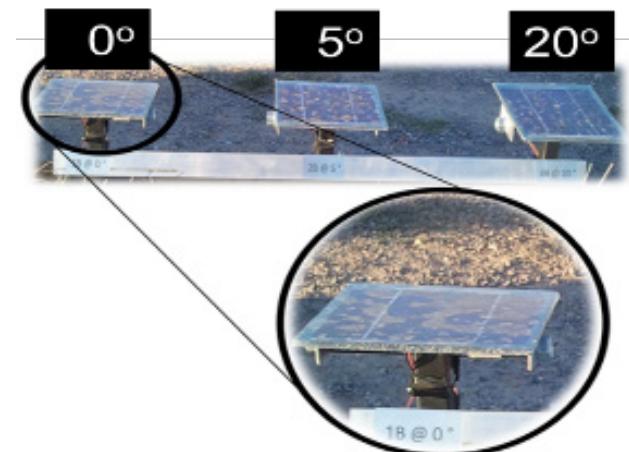

- Inspektem olketa PV arei fo eni saen long eni fisikol dameij olsem impact o olketa fraksa.
- Sefeis hem mas kiln, no eni dameij, klinim eni deti o rabis long antap long panol an adanit long panol sapos hem stap long antap ruf.

FIGA 78: Dameij panols⁷³

Graon hem lus hem inkris taem tilt agol ya hem dikris. Meksua olketa panol ya no flat an lelebet tilt

FIGA 79: Ifekt lo doti panols⁷⁴

9.3 Mentenens blong batri

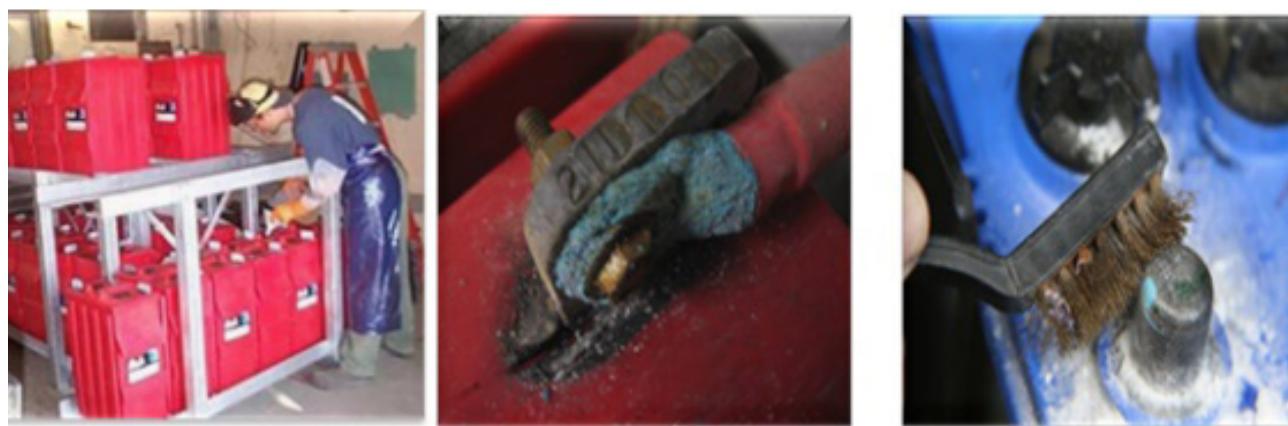

Mentenens long batri hem involvem nao olketa difren waka wea hem dipen nao long olketa taep batri an rikuamen blong kampani wea wakem an hem inkludem:

- Inspektem an klinim olketa batri rak, trei keis an olketa teminol.
- Inspektem batri wea hem diskonekt, olketa ovakarent divaes an waearing sistem.
- Mesarem volteij.
- Batri Iod testing hem aplae long barava hae disaj reit fo samfala sekon, taem mesarem dikris long batri volteij.
- Batri testing kapasiti hem involvem disajing long batri long nominal disaj reit go nao long dept long disaj wea hem priskraeb.
- Rippleism nao olketa batri wea hem no gud tumas long sirias string. Pefomans blong sirias string batri bank bae hem domineit from olketa batri wea no waka gud.
- Mas diskarejem nao ova-disaj blong sistem wea hem happen olowe-Ovayius an ova disajing save ridiusem nao laeftaem blong batri bikos hem garem hae dept long disaj (DOD).
- Mesarem nao spesifik gravati an adem distil wata taem hem lou (fo olketa batri wea hem led asid bat tuweit wan!)
- Piriodic batri mentenens mas inkluedem olketa sek blong olketa teminol fo rast an fo taetem gud.
- Yiusim stil bras fo klinim oksaed long koneksin. Werem olketa insuleisin glav evritaem.

73 Jim Dunlop Solar.

74 Source: ASU PV/ Reliability Laboratory.

FIGA 80: Batri kea⁷⁵

Seifti Tip: Yiusim olketa aeglas an raba glac taem sevesem batri. Werem olketa ol kaleko bikos asid save poa long yu (sapos olketa batri ya tuweit wan)

Kipim wanfala boks blong beiing soda insaet wata, stearem a yiusim nao miksa fo kuiktam niutrolaesem eni asid wea hempoa.

Lou volteij hem no sok hasad ya bat hae karent nao sok hasad. Sapos yu dropem rens akros long teminol bae hem save bonem kuiptaem nao han blong yu an batri bae save bosta tu.

FIGA 81: Steit blo saj⁷⁶

State-of-Charge	Specific Gravity	Open-Circuit Voltage (V)
100%	1.265	12.6
75%	1.225	12.4
50%	1.190	12.2
25%	1.155	12.0
0	1.120	11.8

For typical lead-acid battery at 25°C

9.4 Mesarem nao steit blong batri taem hem saj

Steit long batri taem hem saj hem mesa long helt an kapasiti blong batri. Hem garem tufala wei fo mesarem diswan-open sekret volteij an taem mesarem spesifik gravati (SGO blong elektrolaet (hem waka nomoa fo olketa batri wea tuweit taep.

9.5 Metod long Volteij

Batri spesifik gravati (tuweit taep batri nomoa) an open sekret volteij save mesarem taem duim mentenens fo ivalueitem nao helt blong batri an estimeit steit of saj blong batri.

9.6 Haedro mita metod (fo olketa batri wea tuweit)

Olketa haedromita mesarem nao elektrolaet spesifik gravati (SG) taem ekstratem no olketa elektrolaet from batri sel go insaet samba.

Safety Tip: Inveta hem givim nao hae denjares AC volteij blong 220-240 V. Wearem elektrikol insuleisin glac an folom evri seifti prosija.

Tufala grandma from wanfala vilij long rurol eria jas kam baek nomoa from wanfala Sola O & M beisik an tufala stori nao.

Tima: Mi barava hapi tumas nao mi save go atendem nao dat fala treining ya- Mi tinges kasem eij blong mi bae mi no save lanem eniting-bat mi rong.

Anna: Ya, mi fil olsem tuya-barava staka samting nao fo lanem an mi barava supraes nao mi save folom nao no mata infomeisin hem teknikol.

Tima: Maen hem save tumas- sapos yumi openem maen blong yumi fo lanem niu samting-yumi save duim nao. MI hav to talem mi seleva dat mi save duim an olketa pikinini an grani blong enkarejem mi tu.)

Anna: Mi save dat bae mi no save duim sapos family blong mi no sapotem mi-distaem yumitufala sola teknisian nao.

Tima: Sapos yumitufala laek fo rimebarem olketa samting ya, yumi mas mit wantaem insaet long wik fo go tru wanem yumi lanem. Wanem tingting blong yu?

Anna: Ya, mi agri. No mata yumi garem kas paoa sistem from EFL, staka long olketa haos insaet vilij yiusim sola an long dea nao yumi save help.

Tima: En wetem paoa kat olowe distaem, mi ting staka famili bae siusim nao sola sistem ya. Olketa sola sistem ya bae hem popiula ya.

Anna: Ya, yu raet. Sola paoa sistem long batri ae hem mekem olketa haos fo save stoarem paoa long detaem from san an yiusim long ivining fo paoarem haos an olketa aplaens.

Tima: Mi hapi tumas yumi duim diswan tugged fo sapotem olketa pikinini blong yumi, olketa grani blong yumi an ful vilij wetem yumi sapotem tu envaeromen.
