Disfala Lenas Wakabuk (LW) hemi teken aot from Treinas Gaed (TG) wea kam wetem. Olketa infomesin insaet long disfala LW olketa bin mekem isi an sot. Olketa raetim daon noma olketa mein aedias noma a wea olketa fokas na long olketa piksas, daegrams an olketa aktivitis blong hem wea alaom na lenas fo engeij wetem olketa trenas taem blong treining. If yu laekem eni adisinol infomeisin long eni seksin insaed, yu save luk go nao long Trenas Gaed (TG) blong Lenas Wakabuk (LW) ia.

Foto long Buk Kava: Pico-Haedro Sistem taem hem waka (opereisin).

Sos: Paowerspouts NewZealand.

Stetment fo dikearem no eni responsibili: Global Green Growth Institute hem no promesem, long toktok o mining, o hem no garem eni ligol laeabiliti o responsibili long hao stret, komplit o hao eni nara mek tri pati hem iusim, o risalt blong olketa iusim, eni infomeison, tul, produkt, o proses weahemi stap insaed long infomison long disfala dokument o hem representim dat eni yus bae hem no brekem lo blong olketa praevet ona raet.

MINING BLONG OLKETA WODS INSIDE LONG WAKABUK IA

AC Karent: Olterneting karent hemi wan taep blo elektrisiti wea hemi sens olowe noma, hem prodius bae oketa invetas, jeneretas an bigfala paoa sitims.

Ah: hemi Amp-aoa , Hem minim wan ampio blo karent save flou fo wan aoa

Kemikol eneji: insaet long olketa batri, olketa kemikol ya yius nao fo storem eneji mekem yu save yiusim fo onim nao redio, sajem fon o olketa laet long naet.

Karent: (A) – hemi flo blo elektrisiti saj insaed lo seket waeas

DC karent: hemi karent flow lo wan daereksin an /o garem na volteij wetem constant polarity

Eneji: Hemi paoa wea hemi teken from making yus lo fisikol o kemikol risosis, espeseli fo provaedim na laet an hit (hot) o fo wakem na masins. Hemi simpli ability fo duim waka

Hanes (as PPE): Hemi fom blo pesonol protektiv ekwipmen (PPE) wea hem disaen fo kajim na man inkeis em foldaon from hae ples taem hem waka

Hit Eneji: hemi tu temol eneji, hemi eneji wea wanfala objek garem bikos lo muvment blo molekuls blo hem. Hae tempreja or eneji from hit

Hed: Vetikol distans from point wea wata enta an intek go lo point wea wata livim na haedro paoa divaes. Hemi jenrolis mesad lo fit o mitas

Haedro eneji: hem paoa wea hem kam from eneji from wata wea hem ran fast an save putum fo samfala yiusful rison. Haedro eneji hem wanfala riniuabol eneji.)

Haedro - Paoa: Paoa wea foling wata na prodiusim

Mekanikol eneji: diswan hem eneji wea ejin long bout hem givim fo roteitem nao propel fo muvum nao bout. Hem semsem olsem ejin blong ka or tarake wea mekem olketa taea fo muv.)

Megawat: wan million wats

Nem Plet: Saen wea hem pas lo samting an wea hem talem na nem blo ona, okupaea, meka, o oketa nara ditaels.

Radiasin: Eneji wea travol bae weivs o patikols, in patikula na elektromagnetik radiasin osem hit ox-reis

Temol Eneji: hemi eneji objek garem biko lo muvmen blo molikuls blo hem

Volteij: Hemi presa from wan elektrikol seket paoa sos wea pusim na sajd elektrons (karent) fo go pas na lo kondakting lup, eneibolim na oketa fo duim na waka osem laetim ap na lae.

Wat: Reit wea waka hem dan lo elektrikol seket. Hemi wan juls o waka dan lo wan sekon

Wh: hemi Wat-aoa wij mins dat wan watpaoa hem save flo fo wan aoa

1

Introdaksin

AKTIVITI 1

Introdiusim yuseleva. Also talem wat nao yu save duim long taem olsem. Yu garem eni eksperiens wetem haedro paoa? Wanem nao olketa tingting blong yu long haedro paoa?

2

Wanem nao
Haedro Eneji

2.1 Wanem nao eneji?

Eneji hem abiliti fo duim waka. Eneji save sensis from wan fom go long narawan an den bae save yusim fo waka. Samfala fom long eneji nao:

- **Hit eneji:** Traem tingim baek taem yu statem faea fo boelem wata.

FIGA 1: Hao hit eneji boilim wata¹

The burning wood gives out heat energy and heats the pot. This heat helps to boil the water. The heat energy gets transferred to water. We all know how hot boiled water is.

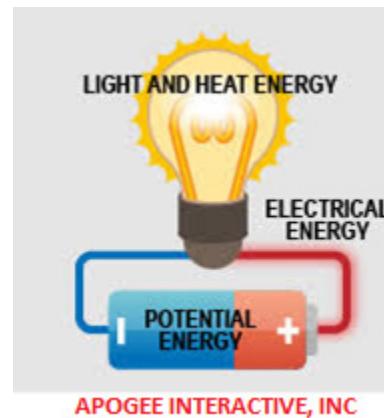

- **Mekanikol eneji:** diswan hem eneji wea ejin long bout hem givim fo roteitem nao propel fo muvum nao bout. Hem semsem olsem ejin blong ka or tarake wea mekem olketa taea fo muv.

FIGA 2: Mekanikol Eneji from propel²

- **Kemikol eneji:** insaet long olketa batri, olketa kemikol ya yius nao fo storem eneji mekem yu save yiusim fo onim nao redio, sajem fon o olketa laet long naet.
- **Elektrikol eneji:** diswan hem eneji wea muv insaet long olketa waea fo givim paoa long olketa samting wea save yiusim paoa.

FIGA 3: Elektrikol Eneji³

2.2 Wanem nao Haedro Eneji?

Haedro eneji hem paoa wea hem kam from eneji from wata wea hem ran fast an save putum fo samfala yiusful rison. Haedro eneji hem wanfala riniuabol eneji.

Ples for Storem wata - yiusim dam o resevo fo storem nao wata wea hem flou from blong riva bifoia hem rilis go long tebaen fo mekem nao paoa fo yiusim. Diswan hem letem nao fo ren wea hem save stap an save yiusim taem tuweit an drae sison insaet long yia.)

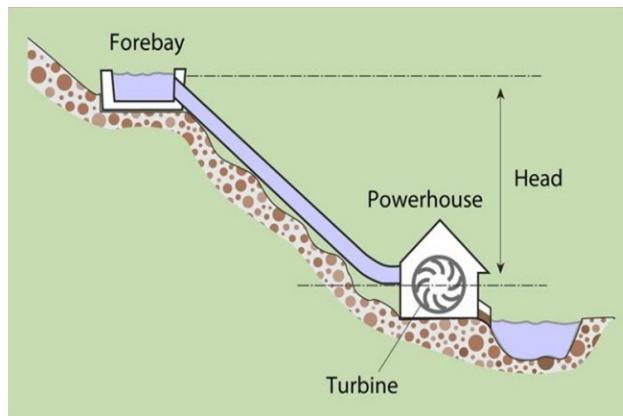

Ran-blong riva skim - diswan taem daevetem nao lelebet long flou blong riva wea ran go long paep o sanol go long tebaen fo mekem nao paoa. Diswan hem isi nomoa fo bildim an save duim yiusim lokol matiriol wea hem sip nomoa an bae no spoelem tumas envaeronmen taem flad olsem.

FIGA 4: Beisik Haedro Paoa setap⁴

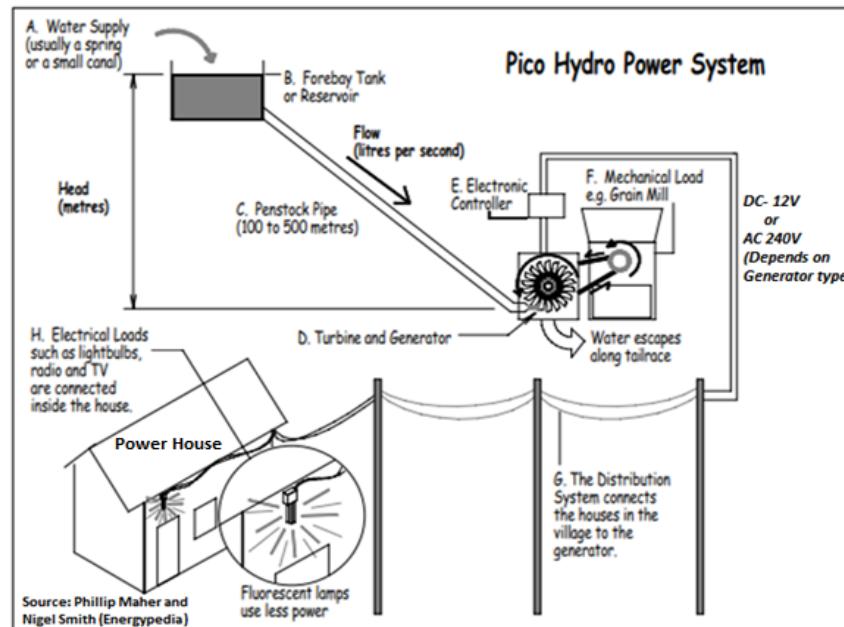

2.3 Wanem nao Piko haedropao?

Pico-haedropao hem olsem haedropao bat long smol skel. Smol Pico-haedro hem kolsap sem long Sola PV sistem wea hem save stanap seleva wea eneji wea hem generiteit hem staps insaet batri an save yiusim taem laek yiusim. Pico-haedro sistem hem mek yius nao long potensol eneji long wata wea hem flou fo roteitem tebaen an kinetic paoa hem konvet go nao long elektrisiti taem yiusim nao elektrik genereita.

- A. Diswan hem wanfala smol dam wea olketa save kolem olsem Weir wea hem yius nao fo daerektem wata sos go nao long Forebay tank
- B. Resevo hem save holem nao samfala wata fo daerektem nao wata go long penstock
- C. Penstock karem flou blong wata go long tebaen
- D. Tebaen Wetem potensol eneji blong wata, rebaen hem roteit wea hem konekt go long jenereita wea mekem paoa o save konekt go long eni mekanikol lod (olsem hao hem sou long)
- E. Save yiusim kontrola fo control/reguleit aotput blong paoa
- F. Transmison laen karem paoa go long olketa haos.
- G. Paoa wea hem jenereited hem save DC-12V o AC-240V. Diswan hem dipen nao long taep long jenereita yu yiusim an paoa yu ekspekt fo prodiusim.)
- H. Haos bae givim samfala ikiupmen. Sapos DC paoa hem transmit, batri, saj kontrola, inveta an lod bae mas yiusim. Sapos AC paoa nao hem transmit den bae AC lod nomoa bae yiusim.
- I. Presa wea hem kam tru long drop long altitud bituin forebay an paoahaos(haoshol) olketa kolem long Hed.

AKTIVITI 2

1. Waswe yu ting dat taem yiusim haedro dam hem daonem polusin?

2. Olketa wanem kaen eneji nao haedro eneji sistem save prodiusim?

3. Waswe olketa haedro dam save spoelem nasrol wael laef

AKTIVITI 3

1. Diskas long klas sapos yu lukim finis wanfala haedropaoa sistem? Searem ekspierens blong yu.

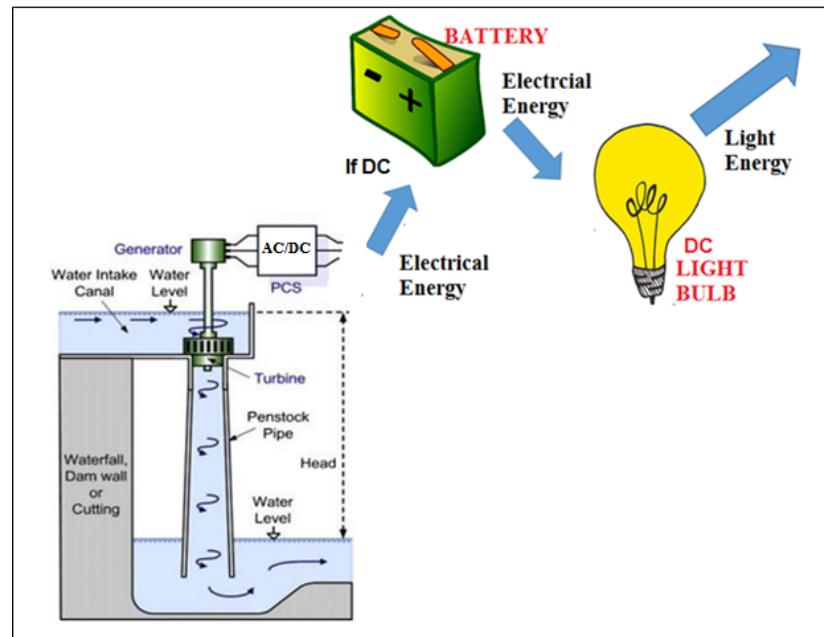

3

Beisik long
Elektrisiti —

3.1 Elektrikol Eneji

Elektrikol eneji hem olsem narafala fom long eneji. Long daegram ya, yu save lukim hao diswan hem happen

FIGA 7: Hao Haedro eneji senses foms of eneji fo givim na laet⁷

Figa 7 som hao nao haedro eneji hem sens go long elektrikol eneji taem yiusim haedro tebaen/jenereita.

3.2 Eneji insaet batri

Eneji wea hem stap insaet batri hem yiusim kemikol. Wanfala komon risajabol teknologi hem led asid batri (olsem batri blong tarake) no mata lithium-ion batri hem kolsap olsem olketa wea yumi yiusim long mobael fon an laptop nao hem stat fo kam ap bat hem dia.

FIGA 8: Led Asid Rijajabol Batri⁸

Seifti Tip: Eneji blong eni fom wea hem elektrikol eneji from jenereita o from batri hem denjaras tumas ya an hem save kosem karakil sapos yumi no keaful. Olowe folom olketa seifti rui taem waka wetem eneji.

8 Source: JICA

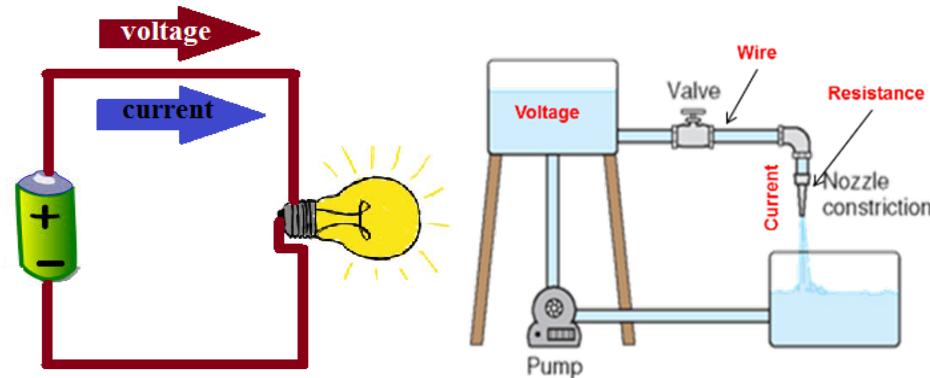

3.3 Paoa

Long simpol tem, yumi difaenem paoa olsem eneji wea hem yius long taem blong hem. Yunit blong paoa hem Wats (W). 1000 wats hem semsem olsem 1kilowat (kw).

FIGA 9: 4 W Laet Balb⁹

FIGA 10: Volteij an karent mekao paoa volteij hem osem na presa insaed wata tank¹⁰

Volteij hem mesa nao long yunit volt an karent hem mesa olsem Amperes or Amps. Yumi olowe laek fo save hao mas karent an volteij nao hem stap long olketa waea ya. Yumi save se dat volteij hem olsem nao dip blong strim an karent hem strong blong strim. No mata strim hem no dip-sapos fos long wata hem strong tumas, hem save mekem yumi draon. Hem sem nomoa long lou volteij-sapos karent hem hae hem save fit fo man dae long hem.

3.4 Volteij an Karent

Volteij hem elektrikol potensol o presa wea muvum electron insaet long waea (kondakta) an save kompearem go long presa insaet wata paep.

Karent hem koleksin blong flou blong olketa electron. Olsem nomoa wata wea flou from hae ples go long lou ples long fos blong graveti, karent hem flou tru long olketa waea yusim nao fos blong volteij.

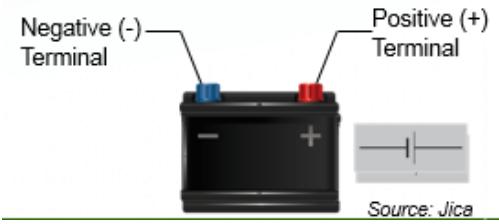

3.5 AC an DC system

Karent wea yumi tekem from batri hem daerekt karent o DC bikos hem no sens. Long DC or daerekt karent, karent hem flou daerekt from positive go long negative teminol an garem wan valiu nomoa. Long olketa bik divaes, yumi garem AC karent o narafala karent wea karent ya olsem wev. Long AC sistem, yumi garem laev, niutrol an graon.

Difren taep haedro sistem —

5.1 Olketa taep blong klasifikeisin blong haedropaoa

Save klasifaem haadro paoa sistem olsem lou, midiam an hae hed haadro.) Diswan hem minim nao hed, haet wea wata drop long hem.

TEBOL 3: Klasifikeisin folom “Hed”

klasifikeisin	Hed
Lou	1-30m
Midiam	30-100m
Hae	100m an go ap

5.2 Olketa saes blong Haedropaoa

Hem garem 6 taep long haadro sistem. Evri sistem ya garem semsem konsept bat paoa aotput hem dipen nao long hao mas wata flou yu garem an haet distens (vetikol distens) bituin resevo (dam) an tebaen.

TEBOL 4: Haadro Sistim Taeps

Klasifikeisin	Plan aotput (Kapasiti)
Pico haadro	Lou den 10 KW
Maekro-haadro	10kW-100kW
Mini-haadro	100kW – 1 MW
Smol-haadro	1MW – 10MW
Midiam-haadro	10MW –100MW
Laj- haadro	Haeya den 100 MW

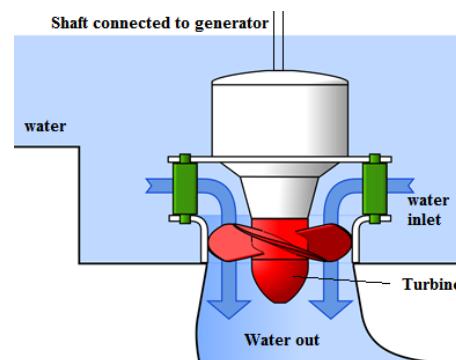

5.3 Piko- Haadro

Piko-haadro sistem hem wanfala smol sistem (les den 5kW). Hem no nidim bik wata flou an vetikol distens. Olketa diswan ya save yiusim nao long olketa smol komiuniti.

FIGA 19: Piko-haadro sistim

27

28

5.4 Maekro-Haedro

Maekro-haadro (5-100kW) sistem hem semsem olsem Piko bat difrens nao hem saes blong tebaen wea save yiusim, a jenereita kapasiti hem bik tu.

FIGA 20: Maekro-Haedro Sistim²⁹

Baem na Pico-Haedro
Sistim —

7.1 Hao fo baem nao hom haedropaoa system

Hydropaoa sistem hem lelebet had fo minim anles yu aedentifaem nao wat kaen saes nao yu laekem.

7.2 Samfala kuestin fo askem nao sela

1. Waswe produkt ya garem waranti tu? Waranti hem fo eni folt insaet long taem wea sela save sensim fo yu. Sapos waranti hem fo long taem hem bae gud.

FIGA 33: Waranti Simbol⁴¹

2. Wat kaen taep tebaen nao long system? Wanem nao paoa aotput blong jenereita? Sistem ya hem DC or AC? Sapos hem AC was otomatik volteij regiuleita hem kam wetem tu?

FIGA 34: Tebaen Taeps⁴²

FIGA 35: Jenrol Karektaristik⁴³

GENERAL CHARACTERISTICS

Certifications:	2006/42/CE (Machinery Directive); 2014/35/UE (LVD); 2014/30/UE (EMC)
Power range:	3 – 750 kW
Head range:	30-550m
Flow range:	2-400 l/s
Number of nozzles:	6
Flow regulation:	on/off valves by electrical drive for flow regulation
Generator:	asynchronous squirrel-cage motors, high efficiency
Generator class insulation/temp. rise:	F/B
Bearings of generator:	lifetime lubricated / with grease-gun
Temperature sensor generator windings:	N°3 PTC in series
Frequency:	50-60 Hz
Voltage:	230/400V - 277/480V, three-phase
Protection grade:	IP23 (protection grade of generator IP55)
Rotational speed sensor:	proximity 1 signal/revolution
The mechanical components in contact with water	are in stainless steel

FIGA 40: Olketa waeas wea eksposd⁴⁸

1. Taem go fo pei olsem, go araon long olketa stoa an kompearem praes, kualati, waranti, olketa saes, if hem bran, seifti an samfala samting moa blong prodakt wea yu laek baem.

2. Askem sela abaoatem olketa kost wea hem kam wetem diswan sapos yu tekem wanfala profesonal fo kam duim waka fo instolem.

Raetem not blong yiu long hia:

AKTIVITI 7

Mekem olketa grup. Displeim nao tebaen/jenereita, batru, inveta, saj kontrola an olketa laet from kit wea hem aveilabol ya. Go long desk wea evri produkt ya hem stap long hem. Yu imagenim nao treina ya hem sela an yu nao baea, yiusim olketa tip wea yu garem long antap ya an askem treina samfala infomeisin moa abaotem produkt.

Samafala impoten kuestin wea mas askem nao:

8

Metenens blong Hom Haedropaoa sistem —

Evri haedro paoa sistem hem rikuarem samfala regula mentenens fo mek sua hem seif an dat hem waka gud an fo mek yius

8.1 Wae olketa haedropaoa sistem hem feil?

Hem garem staka wei hao haedropaoa sistem hem givim problem. Yumi maet notisim diswan bat no tingting strong abaoatem tumas antil hem no waka nao.

FIGA 41: Rabis⁴⁹

8.1.2 Metenens blong Jenereita

- Kipim klin an ea pasej mas klia. Yiusim bloua fo tekemaot dast from insaet jenereita.
- Meksua wata hem go kolsap jenereita
- No dismantelim jenereita fo klinim dast.
- Go sekem teminol

8.1.1 Mentenens blong Tebaen

- Mas sekem olketa skrin long inlet fo meksua tebaen hem klia.
- Luk fo rabis insaet tebaen
- Sekem dat evri drein insaet long tebaen asembli olketa klia.
- Mek sua olketa bearing hem gris an no wonaot.

FIGA 42: Teminol Koneksin⁵⁰

Seifti Tip: NO TASIM ENI TEMINOL AN KOMPONEN WEA HEN MUV TAEM JENERITA HEM RAN

49 Source: Walczak, N. (2018). Operational Evaluation of a Small Hydropower Plant in the Context of Sustainable Development. Pages 7-8. <https://www.mdpi.com/2073-4441/10/9/1114/htm>

50 Source: EC&M, <https://www.ecmweb.com/maintenance-repair-operations/article/20890352/the-basics-of-electrical-overheating>

Long piksa antap ya, wan teminol hem ova hit an sens kala, taem yu lukim sens long hem, yu mas sekem fo stretem. Sapos yu taetem nat ya hem bae no help ya. Hem maet nesesari fo yu katemaot nao nogud pat blong keibol an duim baek nao koneksin.

- Sekem olketa bearing-ofum jenereita o disengeijim from tebaen an roteitem wetem han fo herem eni nois olsem taem hem rabrab. Sapos nois ya yu herem den yu nid fo sensim bearing.
- Ridim nao jenereita manuel an folom olketa mentenens instraksin ya

8.1.3 Mentenens blong Penstok an sanol

- Mas sekem nao penstock paep nogud hem lik an mas repearem baek.
- Mas meksua patwei blong wata hem mas klia

FIGA 43: Meksua Saedwoks no brek⁵¹

Mek sua yu garem gud flou blong wata go long tebaen

Afta hem renren, mas go karem aot inspeksin

Mas meksua olketa gras wea hem grou bik mas kliarem

8.1.4 Mentenens blong Batri

Mentenens long batri hem dipen long taep long batri an rekuamens blong kampani wea wakem an diswan hem inkludem:

Inspektem an klinim olketa batri rek, keis trei an temineisin

Yu mesarem batri volteij sapos yu garem mali mita o ridim nomoa from batri volteij from saj kontrola. Eksampol nao 12V batri mas no go daon bilou 12V fo long taem. Sapos hem olsem, den laef blong hem kolsap en naya.

Samfa saj kontrola garem nao displei skrin bat olketa simpol wan save soum nomoa amaont blong saj levol blong batri taem red laet on.

FIGA 44: LED laets hem somaot na batri saj levol⁵²

- Samfala saj kontrola save displeim nao batri volteij an olketa nara mesamen an olketa narafala mesamen long displei skrin. Yu bae nid fo ridim nao manuel blong olketa kontrola fo lukim hao nao olketa difren mesamen save sou.

9	Sekem batri wata insaet olketa tuweit batri an filim wetem distil wata.	
10	Sekem batri storeij eria hem kol an ea hem sekiuleit gud.	
11	Sekem dat evri laet an olketa aplaens blong sistem hem waka.)	

Raetem not blong yiu long hia:

AKTIVITI 8 - MENTENENS SEKAPLIS

Krietem mentenens sekaplis long evri rutin waka wea nid fo duim fo ekstedem nao laef blong piko-haedro sistem. Trae fo ting hao bae yu duim olketa sek.

AKTIVITI 9

Rison (Pepos) blong eksasaes ya hem fo getem evri memba blong komiuniti fo apresietem nao ki rol olketa woman pleim long taem wakem disison, long manejmen an yius long teknologi. Ridim disfala keis stadi an ansarem olketa kuestin.

Hao olketa woman tekem kam sens

Salo an hasban blong hem Mario stap long Afio long Malaita wetem trifala pikinini blong tufala. Olketa no garem eni paoa long vilij. Mario hem vilij hed an hem fisaman an mas go aot long si bifoan san hem raes fo tekem olketa gud fis an dilivarem long fising steisin wea wanfala aes rum long aelan. Samtaem Mario save tekem kam olketa smol fis fo kukim. Tufala garem trifala pikinini, Lili hem 9, Timoci hem 10 an Salote hem 13 an olketa go long skul wea hem 4 km from haos blong olketa. From haos go long skul hem olsem wan aoa. Olketa garem bik gadan long hom. Olketa garem staka poteito, yam, kabis an olketa tomato fo deili nid blong olketa. Olketa parens blong Mario stap wetem olketa tu. Mario waka had an staka taem hem garem staka samting fo duim olsem ripaerem bout tekem aes, tekem olketa pasenja go long olketa nara aelan insaet bout blong hem long olketa ivining. Sala hem save bisi tu lukaftarem parens blong Mario, lukafta haos, lukafterm pikinini an olketa obligeisin blong komiuniti.

Wanfala ivining, 13 yia ol dota blong tufala Salote hem stadi yiusim kerosin laet. Smel blong kerosin ful insaet haos taem olketa laetem trifala laet. Mario no kam baek yiet from neiba blong olketa wea hem go fo dring kava lelebet. 9 yia ol Lili hem komplein dat smel blong kerosin hem mekem hem sik. Tufala pikinini ya raoa tufala evriwan laek yiusim laet. Lili no min fo tekem nao laet an ranran wetem an laek plei wetem. Taem tufala ranran insaet haos, den nomoa laet ya foldaon from han blong hem, lan long map an faea stat nao. Salote saot fo help an olketa neiba ran kam fo aotem faea bat staka buk blong salote hem bone na. Lili hem fraet tumas fo yiusim nao kerosin laet. Long naet Sala talem Mario abaotem wanfala aedia.

Mario: Rilaks no eniwan hem bone, Bae mi tekem olketa niu buk long en long wik. Wae nao yu wari tumas?

Sala: Mi ting hem taem yumi stop fo yiusim olketa kerosin laet insaet haos blong yumi.

Mario: Wanem? Yu karange ya-wanem nao bae yumi yiusim?

Sala: Mi herem dat yumi save yiusim gud wata wea hem ran o strim fo jenereitem nao paoa. Yumi garem strim kolsap, yu save tok wetem olketa narawan long vilij olsem hed long vilij an diskasem sapos olketa inters fo garem elektrik laet long olketa haos. Vilij blong mam blong garem pico-haedro an olketa pikinini long vilij olketa do gud long skul bikos olketa stadi long gud laet.

Mario: Wow, Yu dimand tumas. Yu fala olketa woman olowe, (Sala stopem hem toktok)

Sala: Wanem nao yu minim taem yu se 'yufala olketa woman'.

Mario: Umm

Sala: Mifala olketa woman mas draevem nao kerosin bikos mifala fil olsem laef hem laek taem no eni paoa. Mi hav to wekap eli taem hem dak yiet an laetem nao smel kerosin laet den kukim kaikai. Mi have to duim ekstra fo stoarem nao kaikai an fis mekem hem nogud an yumi sik long hem. Mi meksua tu dat olketa pikinini duim homwok taem long lelebet laet. Mi mas sevim slen fo no spen tumas long kerosin.

Mario: Ok, mi agri yumi nidim paoa. Bae mi laekem tu frij fo putum fis. Bat Jone talem mi dat pico-haedro sistem hem baem an hem putum bat hem no waka fo wan wik moa. Waswe sapos hem go nogud o hem no waka? An sistem ya bae hem kostem slen? Waswe sapos olketa long vilij no agri?

Sala: Oh my god. Yumi traem. Diskas wetem olketa long vilij an sapos olketa agri yumi save sevim lelebet slen wea yu save tekem from fis taem yu selem evri wika an sapos yumi seiv kasem Krismas bae yumi save baem sistem. Yumi save stori wetem olketa long dipatmen long eneji fo helpem yumi. No wari abaotem mentenens, yumi save tekem help from olketa wea save long sistem ya. Mi save bae olketa lokol atoroti bae help tu. Mi save go fo samfala treining. Oh my god!

Mario. Datwan barava gud aedia. Mi hapi intala agri long diswan an mi hapi fo help lukafterm pikinini an parens blong mi taem yu go treining long pico-haedro sistem. Bae mi stori wetem olketa long vilij tumoro.

En blong Plei

Help ansarem tufala kuestin

- Wat kaen tings nao Sala, Mario an olketa long vilij mas luk fo taem baem nao wanfala pico-haedro sistem?
- Hao nao bae Sala an olketa woman bae tek kea long pico-haedro sistem?

9

**Estimeiting potensol saes
blong haedro sistem** —————

Yumi lanem dat olketa aplaens nomata hem laet balb, frisa, televisin an samfala moa yiusim nao spesifik amaont long paoa (Wats). Adem evriting ya bae givim yu aedia long hao mas paoa yu nidim.

Pico-haedropaoa sistem hem smol ya an hem save paoarem nao olketa aplaens an hem impoten dat olketa yiusa adastanem nao limit long sistem ya.

Amaont long paoa wea haedro sistem save jenereitem hem dipen long olketa samting ya

1. Hed-olsem yumi save diswan hem hao hae wata drop an hem save mesarem long mita (M)
2. Flou- diswan hem volium blong wata wea save putum long tebaen an save mesarem long kiubik mita pa sekon.
3. 1 kiubik mita/sekon hem ikol long 1000 lita botol blong wata pas insaet wan sekon.
4. Graveti-diswan hem konstan (stei sem) an hem 9.81m/s (mita.sekon)
5. Ifisiensi blong tebaen an elektrikol ekuipmen. Ovarol ifisiensi blong sistem blong 50% bae hem risnabol asamson (0.50).

Hem posibol fo estimeit saes blong pico-haedropaoa sistem beis nao long olketa fakta ya an diswan save duim wetem lokol komiuniti wetem asistens. Simpol fomiula fo yiusim nao long daon:

$$\text{Electrical Power Output (kW)} = \text{Head (m)} \times \text{Flow (m}^3\text{/s)} \times \text{Gravity(m/s)} \times \text{Efficiency}$$

Save mesam hed taem duim saet savei. Diswan save duim wetem teip mesa an spirit levol.

Flou blong riva o strim bae dipen nao long sison an taem long dei. Fo garem gud aedia hem gud fo mesarem diswan ovam olketa difren taem long yia bat fo tekem mesamen long barava lou levol vae givim aedia long miniman flou an lou amaont posibol fo jenereitem.

Riva strim flou reit save mesarem nao long namba long olketa wei an hem inkludem nao saet mesamen olsem baket an olketa paep, kros seksin/velositi an flou blong solt. Diswan hem aotsaed skop long disfala woksop bat hem impoten fo adastanem an lokol komiuniti save help fo tekem asistens from lokol gavman blong Eneji o Envaeronsment Dipatmen.

Eksasaes

Kuestin: Saet hem garem hed wea hem 2m an strim hem garem reit blong 51/s insaet sekon (sem olsem filim baket

Ansa:

flou hemi lo litas sekon an nid fo konvetim go lo kiubik mitas lo wan sekon, so bae divaedim bae a 1000. i.e., $5/1000=0.005\text{m}^3/\text{s}$

$$\text{Elektrikol Paoa (KW)} = \text{Hed (2m)} \times \text{Flow (0.005 m}^3\text{/s)} \times 9.81 \text{ m/s} \times 0.5$$

$$\text{Elektrikol Paoa (Kilowatts)} = 0.04905 \text{ kW}$$

$$\text{Elektrikol Paoa (Wats)} = 0.04905 \text{ kW} \times 1000 = 49 \text{ Wats}$$

Kuestin: Hao mas fala laet balb na diswan save laetim ap lo 5 wats ij ?

$$\text{Ansa} = 49 / 5 = 9.8 \text{ so } 9 \text{ balbs}$$

If hed hem dabold i.e., 4 mitas, wanem nao bae saez blo Haedro Sistim lo wats?

$$\text{Elektrikol Paoa (KW)} = \text{Hed (4m)} \times \text{Flow (0.005 m}^3\text{/s)} \times 9.81 \text{ m/s} \times 0.5$$

$$\text{Elektrikol Paoa (Kilowatts)} = 0.0981 \text{ kW}$$

$$\text{Elektrikol Paoa (Wats)} = 0.0981 \text{ kW} \times 1000 = 98 \text{ Wats}$$

Hemi impotent fo som nao dat yu nidim na constant laj flou an gudfala hed fo save instolim na bikfala sistim.
